# Global GDP Comparison Report (2019–2024)

Disclaimer: All figures in this document are illustrative approximations generated for a Retrieval-Augmented Generation (RAG) tutorial. They are NOT official statistics and should not be used for real financial, economic, or investment decisions.

This report compares nominal GDP across seven major economies covered in this sample dataset: the United States, China, India, Japan, Germany, the United Kingdom, and Brazil.

## Nominal GDP by Country and Year (USD Billions)

| Country | 2019 | 2020 | 2021 | 2022 | 2023 | 2024 |
|---|---|---|---|---|---|---|
| United States | 21,430 | 21,060 | 23,320 | 25,460 | 27,360 | 28,780 |
| China | 14,280 | 14,690 | 17,820 | 17,960 | 17,790 | 18,530 |
| India | 2,830 | 2,670 | 3,170 | 3,470 | 3,730 | 4,110 |
| Japan | 5,120 | 5,040 | 5,010 | 4,230 | 4,210 | 4,110 |
| Germany | 3,890 | 3,890 | 4,280 | 4,180 | 4,460 | 4,590 |
| United Kingdom | 2,850 | 2,700 | 3,140 | 3,090 | 3,340 | 3,590 |
| Brazil | 1,870 | 1,480 | 1,650 | 1,920 | 2,170 | 2,330 |

## 2024 Ranking by Nominal GDP

| Rank | Country | 2024 GDP (USD bn) | 2024 Growth (%) |
|---|---|---|---|
| 1 | United States | 28,780 | +2.8% |
| 2 | China | 18,530 | +4.8% |
| 3 | Germany | 4,590 | +0.2% |
| 4 | India | 4,110 | +7.8% |
| 5 | Japan | 4,110 | +0.9% |
| 6 | United Kingdom | 3,590 | +0.9% |
| 7 | Brazil | 2,330 | +3.1% |

## Key Takeaways

The United States and China remain the two largest economies by a wide margin. India has shown the fastest sustained growth among large economies, while Japan's USD-denominated GDP has declined in recent years largely due to currency depreciation rather than a shrinking domestic economy. European economies such as Germany and the UK have seen comparatively slower growth amid energy-cost and trade headwinds.
