Country Overview

Country code	JPN
Capital	Tokyo
Currency	Japanese Yen (JPY)
Population (2024, millions)	124

Executive Summary

Japan has the world's fourth-largest nominal GDP. Its nominal GDP figures in USD terms have declined in recent years partly due to yen depreciation, even as the domestic (yen-denominated) economy has grown modestly. The economy is characterized by advanced manufacturing, a rapidly aging population, and historically low inflation now turning positive.

GDP by Year (Nominal, USD Billions)

Year	Nominal GDP (USD bn)	Real GDP Growth (%)
2019	5,120	-0.4%
2020	5,040	-4.1%
2021	5,010	+2.6%
2022	4,230	+1.0%
2023	4,210	+1.9%
2024	4,110	+0.9%

Sector Composition of GDP (2024 estimate)

Sector	Share of GDP (%)
Agriculture	1.0%
Industry	27.0%
Services	72.0%

Trade & Prices (2024)

In 2024, Japan recorded an estimated trade balance of USD -60 billion (deficit). Consumer price inflation was approximately 2.5%, and the unemployment rate stood at approximately 2.5%. Top exports include Automobiles, Machinery, Electronics, and Steel. Top imports include Crude petroleum, Liquefied natural gas, Electronics, and Coal.

Outlook

Structural headwinds from an aging and shrinking population are expected to constrain long-run growth, though productivity gains, automation, and a weaker yen continue to support export competitiveness.
